WORK EXPERIENCE

Diligence Work Force/Dave Web Hub

November 2023 - Present

Web developer & Content creator | Doha, Qatar

- Designed a dynamic and responsive Wordpress blogging hub
- Producing engaging and high-quality written content on a variety of topics, ranging from technologies, web development, personal development, AI, etc. Aligned with my brand's voice and posted here : davewebhub.com
- Implemented SEO best practices to enhance the visibility and discoverability of blog posts, including keyword research, meta tags optimization, and internal linking strategies, resulting in increased organic traffic and search engine rankings
- Continuous Learning and Improvement: Proactively staying updated front-end technologies and frameworks like React.js. Incorporating emerging trends, best practices, integrating new tools like AI and other techniques to enhance productivity and elevate the quality of web development projects.

Web developer

June 2021 - Aug 2022

Degenius Media Agency | Edo state, Nigeria

- Used HTML, CSS, Bootstrap, Javascript and PHP to design and develop a custom theme that strengthens the company brand's identity with WordPress
- Led the development of visually stunning and responsive websites, ensuring optimal user experience across various devices and screen sizes, while adhering to modern design principles and best practices.
- Crafted dynamic and user-friendly e-commerce websites for some of our clients using WordPress, ensuring seamless functionality and responsiveness to enhance their online presence and drive sales.
- Created compelling content tailored for optimal SEO performance, bolstering brand visibility and credibility to captivate audiences and drive sustainable growth.

PROJECTS

Responsive Personal Website

[View in GitHub](#)

- Crafted a dynamic and visually captivating personal portfolio website from scratch, employing HTML, CSS, and JavaScript to showcase my other projects.
- Designed an aesthetically pleasing and modern layout utilizing some modern CSS Technique like Flexbox to make it captivating and ensuring seamless navigation across various devices.
- Integrated interactive elements using JavaScript and CSS Keyframes to create dynamic animations and scroll-triggered effects for a memorable browsing experience.
- Implemented responsive design principles with CSS media Query to ensure flawless functionality and visual appeal across desktops, tablets, and smartphones, enhancing accessibility and user engagement.

Links Saver Chrome Extension

[View in GitHub](#)

- Developed a chrome extension with vanilla Javascript that effortlessly saves links and tab for future reference
- Seamlessly integrated with the Chrome browser, providing users with a familiar and intuitive interface for efficient link management directly from their browsing environment.
- Provides the ability to delete saved links and Tabs when no longer in use.

Music Playlist Web Application

[View in GitHub](#)

- Developed a standalone Playlist web application with vanilla javascript that can add songs to a list and also can be deleted, connected to a Firebase database.
- Also can be customize to be used as an add to cart App , to-do list app or any adding and deleting of list items functions based Application
- Can be integrated into a DJ's website for crowd-sourced song requests.
